

# The perfect Christmas or New Year present for your system (or your significant other...)

**A little taste of the 10 Series..  
Upgrade your grounding spikes. Upgrade your system.  
Enjoy more music!**

The latest CH Precision components come with our new, composite grounding/levelling spikes. The polymer shafts mated to hardened aluminum tips allow you to get each unit not just level, but really, really level as well as perfectly balanced, optimising the isolation of suspended elements and providing superior dissipation of internally generated vibration.

The flagship 10 Series are supplied with an even more effective version – the aluminum tips are replaced with titanium!

Using the 10 Series titanium grounding/levelling spikes offers a clearly audible upgrade to any 1 Series component, especially if you are using the original steel spikes or third-party supports.

Now, for a limited period, we are offering all 1 Series owners the chance to take advantage of this upgrade at a special price. Spikes sets are available to suit standard height units, and the taller A1.5 and M1.1 – please specify with order.

**All orders for 10 Series titanium spikes received before January 1st 2023 will benefit from a 20% saving.**

**Happy Holidays and  
a very *musical* 2023  
to all our CH customers!**
