

**Thierry Heeb**  
1970 - 2024

CH Precision is shocked and saddened to announce the passing of co-founder Thierry Heeb, on the 22nd July, 2024. The H in CH, Thierry was very much the quiet contributor, specialising in the area of digital filtering and processing, culminating in the ground-breaking PEtER spline-filtering algorithm employed in the C1.2. His team recently completed work on the sophisticated software used to run the DSQ phase-array DAC in the new C10, a fitting monument given his constant quest to further digital music reproduction.

We will miss his quiet brilliance.

Our thoughts are with his wife and two children. We ask only that his many friends and partners in the industry respect their privacy at this most difficult time.
